VIJAYABALAJI V

Electrical & Electronics Engineering Student | Aspiring Software Engineer
Coimbatore, India | +91-9150738758 | Vijayabalajiofficial@gmail.com
GitHub: github.com/vjoffici | LinkedIn: linkedin.com/in/vijaya-balaji-v-8162232b2

PROFESSIONAL SUMMARY

Electrical and Electronics Engineering student (2027 batch) with strong fundamentals in Java, SQL and DBMS, and hands-on full-stack experience building a REST-based web application on MySQL. Combines energy-domain knowledge with unit testing and AI-assisted development practices.

EDUCATION

B.E. Electrical and Electronics Engineering Expected 2027
Sri Krishna College of Engineering and Technology, Coimbatore | CGPA: 7.8

Higher Secondary Education (HSC)
SRM Public School, Chennai, India | Percentage: 85%

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, HTML5, CSS3, C++ (basic)
Frameworks & Tools: Spring Boot, REST APIs, MySQL, JUnit, Git, GitHub
Core Concepts: Object-Oriented Programming, DBMS, API Development, Unit Testing, Version Control

PROJECTS

Energy Usage & Billing Tracker Java, Spring Boot, MySQL, HTML/CSS/JS

Full-stack web application (front-end, back-end and relational database) that helps households understand and estimate their electricity consumption and cost.

- Designed and built a full-stack application where users log appliances with power rating and daily usage hours, and the system calculates daily and monthly energy consumption (kWh) and estimated electricity cost.
- Developed REST APIs in Java with Spring Boot to create, view, update and delete appliance records, with input validation and error handling for invalid data.
- Designed a relational MySQL schema and wrote SQL queries for aggregation of consumption by appliance and monthly cost totals.
- Built a responsive frontend using HTML, CSS and JavaScript that consumes the REST API with fetch calls and displays an appliance table with live consumption and cost totals.
- Wrote JUnit unit tests for the energy and cost calculation logic, and managed the codebase with Git and GitHub.
- Used an AI coding assistant for learning and debugging, and validated its suggestions through code review and unit tests before using them.
